

COMPENG 2SH4 Project – Statement of Contribution

Your Group Number

phama21-huangr86

Your Name

Tommy Pham

Your Team Member's Name

Ricky Huang

You must complete this statement of contribution without discussing it with your project partner, i.e., individually. Your statement should be concise (at most one-and-a-half page). It has three parts:

1. Tell us about your own contribution to the development of your COMPENG 2SH4 project. For example, you can tell us about which project iterations (as mentioned in the project manual) and C++ project classes that you worked on and completed. You can provide a concise answer either in paragraph form or through bullet points.

For this project, my partner and I decided to split some parts but also work together on other parts. I completed Iteration 1B, most of Iteration 2B, helped with Iteration 2A. As for the parts where my partner and I mainly worked together, which was Iteration 3 and the bonus Additional Iteration, we both suggested ideas and wrote code for those two iterations.

2. Repeat Part 1 above but this time tell us about your project partner's contribution to the development of your COMPENG 2SH4 project.

My partner was responsible for completing Iteration 1A as well as Iteration 2A, he also contributed by helping with debugging in Iteration 2B. As mentioned before, both of us have contribution in Iteration 3 and the Additional Iteration.

3. Tell us about your experience in your first collaborated software development through this project – what was working and what wasn't. If you are a one-person team, tell us what you think may work better if you had a second collaborator working with you.

Overall, the experience was much enjoyable in comparison to the previous PPA's as we can receive a second opinion or help with debugging, when one of us is stuck. The only difficulty was, since working on 2 separate section was hard because certain code that you write will be dependent on how the code your partner wrote works. Which is the reason why, we decided to work together for certain parts.
