Hi Ricky,

Sorry for coming back to you late. For some reason I thought I have responded last night. You can make the minor change right now, and upload the screenshot of this email as my approval to your Git repo.

Scott

**Subject:** Project Question

Hello, Dr Chen, After submission of our project yesterday we’ve notice that we had made a minor error in our print statement for the bonus where it tells the user what each symbol does. We accidently swapped the symbols in the code as shown in the picture. We are wondering if we will lose marks prior to bonus or just the bonus. The error is only in print statement, but the logic still works.

Thank you,  
Ricky Huang
